☐ Why choose when your patients can have the benefits of both?

A2. The science that's changed menopausal treatment.

For too long, you've had to compromise on treatment recommendations for hot flashes associated with menopause. Not anymore.

A2 is the first treatment to contain S-EQUOL – a potent ligand that binds to estrogen receptors. It's clinically proven to reduce hot flashes associated with menopause ($P < 0.01$). Available without prescription, A2 offers effective non-hormonal relief with no serious adverse effects.
