

REDUCING THEIR
ANXIETY
DOESN'T HAVE TO
INCREASE YOURS.

NICANOR IS DESIGNED TO ADDRESS YOUR GAD PATIENTS' NEEDS—AND YOUR SIDE EFFECT CONCERNS.

Nicanor is the first once-daily lorazepam engineered to offer a longer half-life and a smoother PK profile for your patients with GAD. It's a result of our commitment to engineer a GAD solution that maximizes treatment benefits while addressing your concerns about potential side effects. Because the last thing you need while fighting patient anxiety, is anxiety.

Benzodiazepine evolved.

“You have to consider adherence and dependency issues with any treatment you prescribe.”

“Right, but does that mean the patient has to endure additional suffering with anxiety to avoid those issues?”

CLOSING THE GAP ON GAD

Easing the anxiety of treating anxiety.
